COMPRESSED AIR, NITROGEN & FLUID POWER SPECIALISTS IN SCOTLAND FOR OVER 40 YEARS

K KERR

Compressor Engineers

Compressed air, on-site nitrogen and fluid power product specialists in Scotland for over 40 Years, we provide a reliable, professional, quality service and 24/7 support for all makes and types of systems.

As the sole Authorised Distributor in Scotland for KAESER HPC compressed air systems, our energy-efficient compressed air systems can be found throughout Scottish businesses and industry, from workshops and garages to factories, distilleries, Aquaculture and utilities providers. From the first point of contact through air demand survey, system design, installation and total care servicing, to end-of-life replacement, we believe in continuity of care, courtesy and professionalism.

Our specialist engineers are multi-skilled, factory trained and have a wealth of experience installing, servicing and maintaining compressed air systems. With the resources and ability to respond to any situation or requirement at short notice; our expert team provide 24/7 service and support of the highest quality to customers throughout Scotland.

UK's #1 Distributor
KAESER
HPC

Support

We provide a comprehensive range of quality **compressed air** and **fluid power** products, solutions and services both nationally and locally.

Operating 24/7 and **365 days a year**, we are trusted to deliver excellent customer service and support, maintaining the many and varied requirements of customers and applications

throughout Scottish businesses and industries. Responding **within 4 hours** and with **over £500,000 of stock** in spare parts and consumables available, experienced, fully trained experts and specialist Compressed Air Engineers provide **unrivalled nationwide support**. Reduce your compressed air and energy costs by calling our experts today.

Setting the standard by focusing on support & service

24/7 SUPPORT

A true 24/7, 365 day a year service, meaning quality support

WITHIN 4 HOURS

Fast response. Guaranteed to be on-site within four hours

HIRE COMPRESSORS

Extensive Hire Fleet of electric and diesel portable compressors

RECOGNISED STANDARDS

Site surveys and energy audits based on best practice and recognised standards

NATIONWIDE SUPPORT

Nationwide support from local engineers across four regional centres

SPARE PARTS

Over £500,000 of stock in spare parts and consumables available

Products

Our compressed air products provide quality, reliable, long-term cost-effective solutions to customers present and future compressed air requirements. KAESER HPC systems are the acknowledged preferred choice of maintenance engineers and production managers throughout Scotland. Our experienced team of engineers provide

comprehensive advice and supply complete solutions for all aspects of compressed air technology. This includes, industrial electric compressors, portable diesel units or rotary blowers, each item of downstream and ancillary equipment – air storage, dryers, filtration, drains plus air management, control systems and more.

KAESER oil lubricated/oil free rotary screw compressors and blowers, feature the very latest energy saving motors and drive systems, thereby delivering maximum performance and energy efficiency

KAESER OMEGA
Rotary Blower Packages

Our comprehensive range of high-quality, energy-efficient compressed air products includes:

- Rotary Screw Compressors 2.2 to 450kw (5.5 to 15bar)
- Variable Speed / Frequency Compressors
- Oil Free Air Compressors
- Packaged Air Systems
- Refrigerant & Desiccant Dryers
- Filtration & Air Purifying Equipment
- Condensate Management
- Compressor Controllers & Air Management Systems
- Air Receivers, Storage & Distribution
- Reciprocating / Piston Compressors
- High Pressure Boosters
- Portable / Engine Driven Compressors
- Rotary Blowers, Exhausters & Vacuum
- On-site Nitrogen Generator Systems
- Used & Re-conditioned Equipment

Cost Effective on-site Nitrogen Gas Generation Systems

High Performance **Nitrogen** generator systems and solutions for **manufacturing** and **processing** industries

We work in partnership with **Peak Gas Generation**, a global leader in the design, manufacture and support of high-performance Nitrogen generator systems for manufacturing and processing industries.

Alongside robust nitrogen generator solutions, our partnership with Peak provides full consultation, system design, project management and access to a global on-site support service that is unrivalled in the gas generation industry.

Specialist Air Treatment Products for High Quality Compressed Air to ISO Standards

High-quality **reliable** and **efficient** air treatment products, components and systems for **compressed air processing**

BEKO TECHNOLOGIES specialist air treatment products, systems and solutions; ensure the required quality of air that our customers demand for their production processes is achieved safely, reliably and energy-efficiently.

Modern production technology requires quality compressed air. The requirements range from dry and oil-free to absolutely sterile. We can provide the suitable processing technology for every application and air quality.

EQOf fluids Compressed Air & Fluid Pipework Solutions

Practical, versatile and cost effective Aluminium tube & Stainless Steel pipe distribution system products

EQOf fluids

As the sole Scottish Registered Distributor for **EQOf fluids UK** pipe systems, we have vast experience of designing and installing reliable pipework systems to provide efficient distribution of compressed air, nitrogen,

vacuum and oil around customer factories, manufacturing facilities or specialist zoned areas and applications. A unique and versatile product, the EQOf fluids range is colour coded to comply with the type of media being transported.

Specialist Oil Free compressors & compressed air solutions

Quality, silent, high performance, oil free air compressors for the **Dental, Medical, Laboratory & Industrial** market sectors

The **EKOM** range of oil free air compressors from **ABSOLUTE AIR & GAS** provide the best Dental, Medical, Laboratory and Industrial solutions from small, compact compressors to large centralised systems.

Suitable for 100% duty with optional dryers to -70°C dew point and with flexible cabinet options; EKOM is one of the leading suppliers of industrial compressors in Europe with a reputation for quality & reliability.

5+5
NO QUIBBLE WARRANTY

Available on all new Compressed Air Packages,

KERR 5+5 NO QUIBBLE WARRANTY

provides unlimited cover for all components throughout the duration of the warranty. The cost of labour and materials are included, ensuring your complete satisfaction and peace of mind

KERR 5+5 WARRANTY is given free of charge provided that you undertake a 5 Year Kerr Service Agreement. After 5 years a new Kerr Service Agreement will be provided and a further 5-year warranty will be given **free of charge**. This will continue throughout the lifetime of the compressor until spare parts are no longer available (typically 20 years).

Unlike other Compressor Service Providers 'free of charge' warranty plans, there are no hidden costs, no stage payments, no excess charges, no previous claim penalties, no restrictions of hours run and **definitely NO QUIBBLES**. If you have a system problem, it will be repaired quickly, efficiently and **you will not incur any labour or material cost**.

Providing **unlimited cover** for all **components** throughout the duration of the **warranty**

WHAT DOES A KERR 5+5 YEAR WARRANTY COVER?

It could not be simpler. It provides unlimited cover for all components throughout the duration of the warranty. The cost of labour and materials are included, ensuring your complete satisfaction and peace of mind. It is available to every customer provided all equipment is commissioned and maintained by us as per the recommended manufacturer intervals. There will be no unforeseen expenses, you will have predictable service costs for the first 5 years, with a revision for every 5 years and can be secure in the knowledge that only Manufacturers Genuine Spare Parts & Lubricants are fitted by expert, factory trained service engineers.

Solutions

We provide bespoke **SOLUTIONS** by working closely with our customers and asking the right questions. Our experienced, specialist engineers understand that compressed air equipment and systems are only as good as their suitability to meet the demands of specific applications and operating conditions. They

must also seamlessly integrate into customer facilities and be able to meet specific objectives, regardless of whether you would like to optimise system performance, are planning a new system, wish to purchase quantities of compressed air at a fixed price or require high quality air to ISO standards.

Our range of **SPECIALIST** compressed air **SOLUTIONS** includes:

- Air Compressor Hire & Rental Equipment
- Finance & Equipment Leasing
- Aquaculture Applications & Solutions
- Marine Environment Solutions
- Containerised & Bespoke Systems
- 'Air Over the Fence'
- Heat Recovery & Ductwork
- Carbon Trust Loan & ECA Advisors
- Site commissioning & Handover Training

Air Compressor HIRE Solutions

- Competitive Rates
- Nationwide Coverage
- Quality Equipment

Air Compressor Hire Solutions, provide an affordable, reliable and flexible compressed air equipment rental service throughout Scotland at competitive rates. From individual air compressors,

complete packages, portable, site and compact compressors, high pressure piston compressors to air treatment products for dry, clean compressed air; we have a cost effective Hire Solution for every demand or requirement.

EQUIPMENT LEASING SOLUTIONS

- Peace of Mind
- Financial Planning
- Maximise Efficiency
- Financial Security

Business Equipment Finance & Asset Leasing Solutions

High-quality **reliable** and **efficient** air treatment products, components and systems for **compressed air processing**

We have teamed up with **Kennet Equipment Leasing**, to enable our customers to invest in the very latest energy saving compressed air products with confidence and without drawing on critical working capital.

Business equipment finance and asset leasing provides the flexibility to preserve cash and other facilities to use later and in other areas of your business, whilst continuing to invest in the equipment and other assets that your business requires.

Specialist Air Solutions for Aquaculture Applications

Durable, energy efficient **Compressed Air & Low Pressure Air Systems** for onshore & offshore operations

Operators of fish farms, whether **onshore** or **offshore**, depend on a reliable, quality supply of low pressure air and compressed air for a variety of equipment, systems and processes. A range of reliable **KAESER** air products are specifically

designed and built to provide maximum durability in **Aquaculture environments** and ensure maximum process reliability to minimise the risk of downtime. We are an experienced supplier to the Scottish Aquaculture community.

Specialist Air Solutions for Marine Environments

Dependable, durable and efficient Marine air systems specifically designed for demanding marine applications

A comprehensive range of **KAESER Marine** air systems features rotary screw compressors, rotary blowers and air treatment components specifically designed for demanding marine environment applications. Specialist solutions include application

specific service air, compressed air for nitrogen generation and blower air for wastewater treatment systems on large cruise ships. **KAESER** marine products are certified by all of the marine classification societies.

Services

We provide expert assistance, support and advice for all makes and types of compressed air equipment

Effective maintenance is essential for the **optimum performance , reliability and efficiency** of a compressed air system. Regular expert servicing can help eliminate the risks associated with costly downtime and maximise productivity. Our specialist compressed air engineers are multi-skilled, factory trained

and have the resources and ability to respond to any situation. Holding an unrivalled stock of spare parts and consumables in excess of £500,000 value along with a large stock of new or reconditioned equipment; we provide service and support of the highest quality to our customers 24/7 and 365 days a year throughout Scotland.

Our range of **QUALITY** compressed air **SERVICES** includes:

- Preventative Maintenance Service Agreements
- Emergency Breakdown/Repair Cover & 24/7 Call-out
- Pipework & Ring Main Installations
- Energy Saving Audits & Leak Detection
- Turnkey Projects & Installations
- Installed System Modifications
- Heat Recovery & Ductwork
- Air Quality Testing & Breathing Air Standards
- Point of Use Flow Metering
- Remote Monitoring & Diagnostics
- Insurance Inspections

Air Compressor Servicing & Preventative Maintenance

A variety of **service plans** plus **fixed price** contract **options** can be tailored to suit each customer's preferences

To ensure the maximum long-term **efficiency and reliability** of a compressor installation or compressed air system, it is important that it is maintained in accordance with the **manufacturers** recommendations. Our preventative maintenance **service agreements** ensure that all customers benefit directly from our investment in expert, specialised training and

have a **guarantee of workmanship**.

A variety of service plans and **preventative maintenance agreements** can be tailored to each customer's individual requirements created by qualified, specialist compressed air engineers to maintain your system in the best possible way and at **peak operating performance**.

Our **specialist** compressed air **engineers** are multi-skilled, **factory trained** and have a wealth of **experience** in **installing, servicing and maintaining** compressed air systems

Advantages of our Premium Servicing & Preventative Maintenance Plans

- Optimised operational reliability and maximum availability
- Lower energy costs
- Guarantee of workmanship
- Long-term value retention and return on investment
- Air quality is maintained to ISO standards
- Ensuring compliance with current legislation and national regulations

Genuine Manufacturer Spare Parts & Consumables

We provide expert advice, support and **genuine parts** for **all makes** and **types** of compressed air equipment

To protect your investment in sophisticated compressed air equipment and to keep it operating reliably at peak performance; we recommend using only **genuine spare parts** and **consumables**. Explicitly approved and branded for your compressed air equipment, these parts have been the subject of **manufacturer development** and

tests in which their reliability, safety and special suitability has been determined. Our stock includes a comprehensive range of service kits that feature all the service items required to complete a variety of service plans and preventative maintenance agreements, carefully created by specialist engineers to safeguard your investment.

Genuine **Spare Parts** & **Consumables** are designed to ensure:

- Maximum reliability of compressed air equipment
- Equipment operates at maximum efficiency
- Compressed air quality is maintained to ISO standards
- Optimum life expectancy and return on investment
- Superior durability and long service life
- Exceptional value for money

Analysis & Advice

Optimise your Compressed Air System

Data logging, Air Demand Analysis, System Optimisation & Tailored Planning of new Systems

Compressed Air Consulting for Trades, Manufacturing & Industry.

Whether regarding optimisation of an existing compressed air system or **tailored planning** of a new system: our customers all over Scotland and **KAESER** customers all around the world, benefit from the consulting and analysis expertise of experienced **specialist engineers** and one of the

world's largest leading compressed air system providers. With specially developed **analytical methods** that comply with **ISO 11011** and a trained instinct for the needs of the widest range of industries, our engineers create **future-proof solutions** precisely tailored to meet your needs and which not only save money but are also kind to the **environment**.

We work with you to **discuss & design** your compressed air future in **four logical steps**:

- **STEP 1** - We discuss, listen and understand your individual needs
- **STEP 2** - Air Demand Analysis (ADA)
- **STEP 3** - KAESER Energy Saving System (KESS)
- **STEP 4** - The optimum compressed air system solution

ADA & KESS

Compressed Air Leak Detection Audit & Management

We work with you to **audit & manage** your air leaks in **four logical steps**:

- **STEP 1** - We plan, discuss, and determine system data e.g. pressure, hours, costs
- **STEP 2** - We conduct the **Air Leak Audit** and tag all the leaks detected
- **STEP 3** - We provide a report, detailing and prioritising the leaks identified
- **STEP 4** - We agree remedial work to eliminate the costly leaks

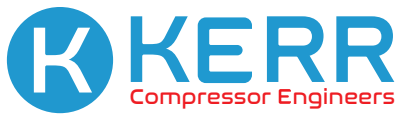

Simple, Precise & Cost-Effective Compressed Air Leak Detection Audit & Management Service

Are you blowing away good money on costly compressed air leaks?

With the high cost of electricity, one of the easiest ways a business can optimise compressed air consumption, **reduce energy costs and lower CO2 emissions** is to fix leaks in its air system. Simple, precise and cost-effective, our advanced **air leak detection audit and management service**

is designed to accurately locate and quantify leaks in your compressed air installation, pipework distribution system and production process. Accurately identifying even the smallest air leak, our detailed survey report clearly documents each costly leak, allowing us to quantify, prioritise, and remedy them for you in a structured and professional manner.

Quality Fluid Power Products from Market Leading Brands

Providing access to a comprehensive range of over 30,000 high quality fluid power products, this **2024-2025** edition of our biennial product catalogue contains carefully selected items from market leading brands including CDC Pneumatics, CEJN, Colder Products Co. (CPC), E.MC Pneumatics, Master Pneumatic, Camozzi and FESTO.

Our **GLASGOW • PERTH • ABERDEEN** and **INVERNESS** Sales & Service Centres are perfectly placed and equipped to serve the fluid power requirements of customers throughout Scotland. Providing expert advice with superior levels of service and support, makes **KERR** the name to trust for **Pneumatics** and **Hydraulics**.

HOW TO SHOP & ORDER

Shop Online 24/7 - 365 days a year

Why not register an online account on our webstore? To shop online with us 24/7, just click on “register” in the top right hand corner and complete the simple form. When logged in, your discount terms display online, you will be able to see live stock quantities plus all of our current or exclusive special offers.

Online Help & Support or visit our Trade Counters

For professional advice and assistance, if you require any additional help or if you have run into difficulties, don't worry! We have a **dedicated web support line**, just call **0800 008 6588** to speak to our experienced, specialist engineers or email webstore@kerrcompressors.co.uk. Our helpdesk is open from 8.30am to 5.00pm Monday to Friday or alternatively you can **visit our Trade Counters**.

Fast Delivery - when you need it, where you need it

We are able to despatch the majority of items on the day of purchase. We provide a reliable courier text / email delivery time confirmation service. When you place an order with us, our logistics partner can email and text you your delivery time to within an hour's time slot. We know that time is of the essence and we are happy to go the extra mile to provide you with peace of mind.

WHERE STANDARDS MATTER

INTERNATIONAL STANDARDS & INDUSTRIAL ACCREDITATIONS

Enjoy the benefits and assurance of working with a national compressor company providing expert service at local supplier rates. **Compressed Air, Nitrogen** and **Fluid Power** specialists in Scotland for over **40 years**, our **international standards** and **industrial accreditations** include:

- ✓ **NQA ISO 9001:2015 Accreditation** - Quality Management System
- ✓ **NQA ISO 45001:2018 Accreditation** - Health & Safety Management System
- ✓ **NQA ISO 14001:2015 Accreditation** - Environmental Management System
- ✓ **CHAS Accreditation** - Contractors Health & Safety Assessment Scheme
- ✓ **JOSCAR Registered** - Fully registered on this supplier accreditation register
- ✓ **Avetta Assessed SSiP Approval** - CDM Scope : Contractor
- ✓ **ECITB Safety Passports** - All Kerr Engineers are accredited and certified
- ✓ **Achilles UVDB Verified** - Safety, Health, Environmental & Quality practices and procedures (B2)
- ✓ **Alcumus SafeContractor Accreditation** - Categories include Compressor Services, Refrigeration Systems Services plus Category Related Activities
